*In 2023, the Kentucky General Assembly passed House Bill 248. This legislation formally defined "recovery residence" in Kentucky law and established a statewide certification requirement for recovery residences. HB 248 authorized the Cabinet for Health and Family Services to designate certifying organizations - the Kentucky Alliance of Recovery Residences (KYARR) and Oxford House, Inc., to ensure alignment with nationally recognized standards. NARR (National Alliance for Recovery Residences) Standard 3.0 was the chosen criteria.*

*In 2024, House Bill 462 was enacted to strengthen local enforcement and clarify operational boundaries for recovery residences. HB 462 allows municipal governments to enforce the state certification requirement. Additionally, it prohibits operators from requiring that residents participate in treatment provided by affiliates, and strengthens licensing requirements for on-site clinical services.*

*In light of these changes, it can be confusing and overwhelming to find high-quality Recovery Housing for yourself or a loved one. NKYODCP has worked to stay up-to-date on the local landscape to make it easier for individuals in need of Recovery Housing. Below is a list of NARR Certified Recovery Housing (or those in the process of being certified) in Northern Kentucky, and information for Recovery Kentucky's NKY residences.*

## NARR Certified/In Certification Process
